

# Use Your Appliance with the MSmartLife App

Before you start, make sure that:

1. Your smartphone is connected to home wifi network, and you know the network password.
2. Make sure you are next to home appliances.
3. The 2.4GHz (preferable) or 5GHz band wireless signal is enabled on your wireless router.

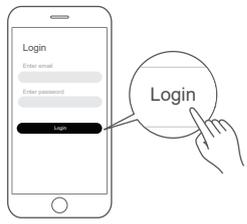

**1** Download MSmartLife App

Scan the QR code below, or search for "MSmartLife" in Google play(Android devices) or App Store(ios devices) to download the app.

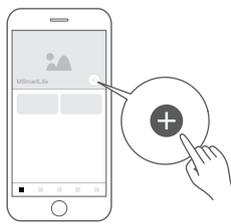

**2** Register or Login account

Open the App and create a user account, if you already have one, just log in.

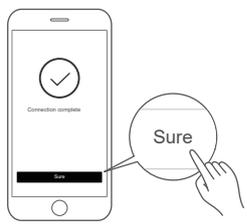

**3** Add your appliance

Tap the "+" icon to add home appliance to your MsmartLife account.

**4** Connected to the network

Follow the instructions in the app to set up the WiFi connection. If the network connection fails, please refer to the App tips for operation.

## WiFi Status Light

	Slowly flashing	Waiting for connection
	Quickly Flashing	Connecting
	Quickly flashing solid	Connected to your wireless router

### Notes on networking

- When networking the product, please make sure that the mobile phone is as close as possible to the product.
- According to the App tips, if the product only supports 2.4GHZ wifi communication, please note that the 2.4GHZ network is selected for connection.
- Midea recommends WiFi router SSID names contain only alphanumeric values. If special characters, punctuation marks or spaces are used it might prevent the SSID name from showing up in the available networks to join in the App. Try it and if the SSID shows up then it is ok to use, otherwise log into the router and change the SSID name.
- A large number of devices on the WiFi router can affect network stability, there is no way that Midea can advise a specific number limitation as this depends on router quality and many other factors.
- If the router or WiFi name and WiFi password change, please repeat the above process to reconnect to the network.
- As the product technology is updated, the content of MSmartLife may change, and the actual display in MSmartLifeApp shall prevail.

# Guidelines for Electric Water Heater Distribution Network

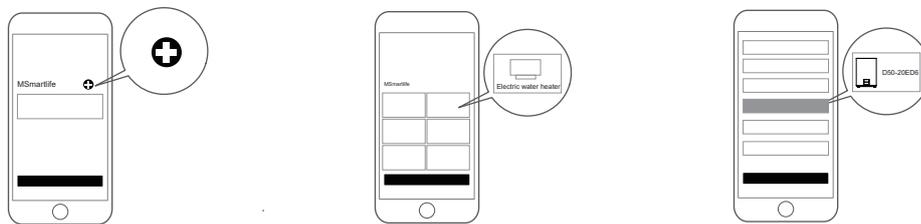

1、 When the water heater is powered on, the wifi signal will automatically activate and flash ( “①” ) . If there is no network operation for 10 minutes, the wifi icon will automatically go out; After extinguishing, you can press this button for 3s to activate again;
